

DRC9

Autonomous dispenser / reloader
of magnetic cards for the payment
of copies and printings

www.rdtoffice.ro

THE DRC9 ADVANTAGES

According to the Cartadis DRC9STD chosen, magnetic reloadable Cartadis cards can be sold and reloaded against coin and/or banknote insertion and/or contactless bank card through the Nayax reader

A full “self-service” operation of the copy and print service

An intuitive and ergonomic touchscreen that allows the display of the user credit and prices

Buying or reloading of cards with 6 decreasing prices available

Buying and dispensing of reloadable Cartadis user cards.

For a site management without requiring staff for selling cards.

DRC9

It enables cards to be dispensed automatically to users who had none, or reloaded, whether their credit had already been spent out or not.

Such cards are solely intended for the Cartadis terminals of access control and payment for MFPs and printers.

With Cartadis DRC9STD and a set of Cartadis terminals, you can fit out a site of several copiers for full "self-service" operation.

This solution is particularly suitable in libraries, public sites, or educational environments.

Statistics

Reloading statistics can be read by the person in charge of the unit and viewed on the screen, or downloaded via an USB key.

These data consist of: receipt on the current period, receipt from installation and number of cards sold

12 / 30
last 30 days

Exemple of use

Cartadis units are especially suitable for a use in a public or a university library.

This can be highlighted by the following example:

- ✓ The library is provided with 8 copiers equipped with Cartadis TC4N's.
- ✓ A Cartadis DRC9STD dispenser/reloader is installed at the entrance of the library.
- ✓ The user can buy or reload a card

CARD BUYING

Buying a card is composed of 4 steps:

01. Selecting of the service wished (buying or reloading) on the touchscreen,
02. Inserting money with simultaneous display of credit,
03. Recovering of the card dispensed in DRC9 receiver,
04. Inserting the card in the reader for credit loading.

CARD RELOADING

Reloading a card is composed of 3 steps:

- 01 .Selecting of the service wished (buying or reloading) on the touchscreen,
02. Inserting money with simultaneous display of credit,
03. Inserting the card in the reader for credit loading
